Patient Engagement and Support Solutions

Rely on Shearwater to increase the efficiency and quality of your patient engagement efforts, accelerate study timelines, and reduce the burden on sites and investigators across the patient journey through our:

- Patient concierge & patient contact center
- Patient engagement (recruitment, consent, adherence, retention, feedback)
- eConsent/ePRO/eCOA

- Patient monitoring:
  - Post-marketing/Real-World Evidence
  - Mobile/digital health solutions and remote monitoring
  - Telemedicine
  - Care management

Remote Monitoring Solutions

Shearwater delivers reliable remote monitoring capabilities to support decentralized clinical trials. Driven by our optimized process model, we provide the support to help you overcome the industry's chronic shortage of clinical talent, saving you time and money. Shearwater advances your clinical development pipeline while ensuring regulatory, ICH-GCP, and protocol compliance with:

- Site qualification
- Site visits (initiation, interim, and closeout)
- Post-marketing/Real-World Evidence

- Site management activities
  - Source data verification
  - Site query management

Teams that perform to their full potential have the right combination of skills, process knowledge, training, and flexibility. Having these valued qualities on your team is essential for successful clinical trial delivery and commercial launch. With the scarcity of resources in the life sciences today, clinical talent is hard to find — unless you partner with **Shearwater Health.**

Pharmacovigilance and Safety Solutions

Shearwater's safety reviews include clinical insights, which lead to better outcomes, as well as low-cost case processing centers for effective outsourcing. With Shearwater handling your safety review and reporting responsibilities, we support you in maintaining regulatory compliance through:

> Safety case management & reporting
> Patient contact center

Clinical Data Abstraction and Curation Solutions

As the precision medicine market grows, turn to Shearwater for experts who convert data into actionable insights and transform unstructured data into outcomes data. Our employees have the experience and skills to analyze clinical and molecular data at scale and provide:

> Extraction, structuring, and analyzing of data to construct foundational database
> or clinical context for each patient case, including:
>   - Clinical note review and organization
>   - Lab reports
>   - Pathology images
>   - Radiology scans to capture phenotypic, therapeutic, and outcomes data
> Review of protocol-specific inclusion/exclusion eligibility criteria for trials

Shearwater's deep talent pool supplies quality-focused, highly trained people for these critical life sciences roles.

With our track record of high performance and availability of skill, rest assured we're the strategic talent partner you can count on.
